Country name: Republic of Moldova 

Capital: Chisinau

Population: 3,547,539
(National Bureau of Statistics data,
as of 1st of January 2018)

Area: 33,846 km²

Geographical location: Moldova is situated in the south-east of Europe. It borders Romania and Ukraine

Official language: Romanian

Languages spoken: Russian, Ukrainian, English, French, German, Turkish, Italian

Exchange rate (average 2018): US\$1 = 16.79 MDL (Moldovan Lei)

Gross Domestic Product: US\$9,560,608 (2017, current prices)

GDP per capita: US\$2,694 (2017, current prices)

Employment rate: 40.5% (2017)

Inflation rate: 6.5% (2017)

Minimum salary: US\$155 per month (2018)

Free Trade Agreements:

- **DCFTA** (Deep and Comprehensive Free Trade Area with European Union);
- **FTA with CIS countries** (Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Uzbekistan);
- **FTA with Turkey;**
- **CEFTA** (Central European Free Trade Agreement – Moldova, Macedonia, Albania, Serbia, Montenegro, Bosnia and Herzegovina and UNMIK (Kosovo));
- **GUAM** (Organization for Democracy and Economic Development (Georgia, Ukraine, Azerbaijan, and Moldova)).

AN OVERVIEW OF THE MOLDOVAN MACHINE BUILDING INDUSTRY

Geography of companies in the analysed industries, companies

Value of production, million US\$

2016

2017

Top 5 categories

-  C22, Manufacture of rubber and plastic products
-  C23, Manufacture of other non-metallic mineral products
-  C24, Manufacture of basic metals
-  C26, Manufacture of computer, electronic and optical products
-  C27, Manufacture of electrical equipment

The Moldovan machine building industry was founded on a strong Soviet industrial past. Since then, it has undergone significant changes as compared to the Soviet period. Up till 1990, the USSR invested into capital construction and development of large plants in Moldova producing various equipment both for civil and military purposes. Since then, several Soviet time leaders have practically ceased their activity in the sphere of machine building and have reoriented to other domains, primarily renting the facilities that were used for production purposes in the past. New industry leaders have oriented their production to other domains.

Currently, when talking about Moldovan production and exports of automotive industry products, it can be stated, that cables have become the top export category. Several large foreign investors have opened their plants in larger cities of Moldova: Chisinau, Balti, Ungheni, Orhei, Comrat.

Some of the leading local companies do have a Soviet past, they maintained their focus of activity and continue to specialize in the same spheres as before, other companies are new, and they started their production with no Soviet legacy. The companies in machine building sector in Moldova produce hydraulic equipment, hydro-acoustic navigational devices, agricultural equipment, commerce equipment and other types of machines and equipment.

Another important sector comprises companies that produce potential components for machine building industry – rubber, plastic, metal products. There are several local companies producing metal products, plastic products, rubber production is less developed. The third important component of the machine building is the sector rendering services for machine building companies. In Moldova, these are mainly companies rendering services of engineering activities and related technical consultancy, companies doing repairs, technical testing and analysis.

RUBBER, PLASTIC AND METAL PRODUCTS

ACM MUNCEȘTI LTD

Founded in 1999

ACM Muncesti provides design, production and mounting of different metal constructions including industrial buildings (warehouses - metal or reinforced concrete, for production or storage, refrigerated warehouses, logistics centers, firms with production spaces), civil buildings (exhibition halls, multifunctional halls, shopping complexes, supermarkets, hypermarkets, shops, commercial areas, offices buildings, hotels, dormitories, hospitals, houses, cottages, duplexes, vacation homes), agricultural buildings (agricultural production workshops, agricultural warehouses).

ARES UT SE

Founded in 1995

ARES UT SE is one of the leaders on the metal and iron production market in the Republic of Moldova. The history of the company dates back to 1945, originally a tractor building company. Today, the factory is equipped with modern melting systems, casting machines and cores production machines, and automated forming lines. The factory produces a wide range of iron and steel products of different shapes and complexities ranging from 0.1 kg to 2500 kg.

BILARGO PRIM LTD

Founded in 1997

Bilargo Prim Ltd is located in Chisinau, and is currently the only producer of polyurethane foam in the region. The company is able to produce a full range of polyurethane foams of all possible shapes. The foam is used in households (sponges, furniture), as well as for companies that produce toys, clothes padding, heaters, vehicle seats padding etc.

BOLID LTD

Founded in 1997

Since being founded, Bolid Ltd has managed to expand their product and service range, producing individual parts of plastic, metal and electronic devices. Now, they manufacture security alarms for banks and other institutions, redundant power sources, power supplies, transformers, fire alarm sirens, manual fire detectors, switching boxes, fire cabinets and consumer goods, like decorative fencing for the heating radiators, barbecues, etc.

COLASS JSC

Founded in 1995

The company specialises in consulting on how to select and use the equipment and technological lines for grain processing, transporting and storage. Additionally, the company manufactures industrial constructions, namely metal carcasses, and offers engineering design services for a wide range of constructions. Colass JSC is in partnership and collaboration with Hetech company in Hungary. Sales shares are 100% redirected to the B2B segment.

KASS EXPO INTERNATIONAL CORP. LTD

Founded in 1997

The company's main activity includes the manufacture of metallic tiles and drainage systems. Kass Expo International Corp. produces pluvial systems, sandwich panels, corrugated sheet steel, roof accessories and light metal constructions. The company deals with the retail of ironmongery, glassware and dyed products in specialized shops and provides business and management consulting. In the last 3 years the company exported mainly to Romania. The share of sales targeted to the B2B segment is 60%.

UNIPLAST LTD

Founded in 1992

UNIPLAST focused on the manufacture of pipes for technical purposes out of recycled polyethylene, in the early years of its establishment. Since 1995, the plant has been producing pressure pipes for drinking water. From 2005, the company started producing polypropylene sewage pipes. In 2006, the company bought new equipment and began pre-damping PE pipes - 20 - 110 mm for gas transport. In December 2008, the company installed a new line for the production of gas and dhw gas pipes from the EP. In 2015, new equipment was installed to produce sewer pipes.

THE MACHINE BUILDING INDUSTRY

ALEX S&E LTD

Founded in 1993

Alex S&E LTD is one of the biggest manufacturers and distributors of weighing equipment for industry and trade in the Republic of Moldova. Since 1993, the company has expanded and opened two additional branches in Moscow, Russia, and Kharkov, Ukraine. The company produces and distributes production platform scales (from 1 kg to 5 tons), truck and rail scales (from from 10 to 250 tons), along with weight control equipment from automated systems (for warehouses, supermarkets, restaurants, as well as raw materials and semi-finished goods) and consumer scales.

ARTMET JSC

Founded in 1956

Back in 1956, when Artmet Mechanical Plant was established, the main task of the enterprise was to provide non-standard equipment for industrial enterprises, install it, as well as launch the production process with the use of the new equipment. In 2000, Mechanical Plant Artmet Joint-Stock Company was created. The company is now specialized in the production of matrices, moulding forms for metal and plastic, non-standard equipment, equipment for automatic screwing for railways, equipment for food industry, mass-market products from metal, such as universal razors, cutlery and medals.

process used

- design and engineering of new products
- cutting the metal
- cold stamping
- changing metal forms
- electro-gas welding

products

- food industry equipment
- non-standard equipment
- equipment for launching anti-hail rockets
- machine for automatic screwing on the railways
- matrices for perforation

ASPA JSC

Founded in 1995

ASPA JSC specializes in mechanical processing of various metal parts and items on customer's demands or as per customer's samples and/or drawings including precision parts, stainless steel parts, heat resistant steel parts, titanium alloys parts and other hardworking materials parts. The company produces components for machines from various industry branches - for the food industry (packaging machines, foil extrusion machines), for hydraulic systems, for gear reducers, valves and pipes etc. They also manufacture technological equipment such as molds, plastic molds, rubber molding presses, and measuring tools including calipers.

BERHORD LTD

Founded in 2002

BERHORD is a group of independent companies, which collaborate in the following industries: winemaking, canning, dairy, brewery and pharmaceuticals on CIS and EC markets in Russia, Ukraine, Azerbaijan and Moldova. The companies in Moldova (3 out of 8 from the group) focus mostly on producing equipment for the food industry, and the production of industrial control system boards, automated pasteurizers, automated tartaric treatment heat exchangers, conveyor systems and multistage membrane filter housings, engineering, supply, mounting, starting up, servicing, automation, modernization and piping of processing lines and distributing of components for industrial automation and conveyors.

ELIRI JSC

Founded in 1959

ELIRI JSC was established in 1959. Initially, research and development work was carried out here to develop and introduce new types of products based on microwire. Currently, ELIRI is a company that is specialized in the production of microwires and microwire-based products. The company has developed the production of cast microwires in glass insulation with a core diameter from less than 1 μm to tens of μm . Microwires are produced from various metals and alloys: conductive, resistive, magnetic, semiconductor with their simultaneous coating with glass insulation, using the classic Taylor-Ulitovskiy method, which is a hybrid method.

RAUT JSC

Founded in 1944

JSC Raut is a mixed-capital company with a state share of 76% and is situated in Balti (second largest city in Moldova). Since 2012, JSC Raut is the administrator enterprise for the Industrial Park Raut. The company produces hydro-acoustic equipment, industrial equipment, metal components, plastic and rubber components.

The enterprise was established in 1944 as a mechanical plant. At that point, its activity was mainly aimed at repairs of military equipment for the Red Army. After the war, the enterprise started producing mechanical equipment for civil purposes: presses, perforating machines, agricultural equipment. From 1951 the enterprise was reorganised into a company specialised in hydro-acoustic equipment for navy, maritime research, and in 1978 it started production of mass-market products. In 2012, JSC Raut obtained the status of industrial park, on the basis of the company's assets on a territory of 9.5 ha.
