[EXECUTIVE] [SUMMARY]

EXECUTIVE SUMMARY

FOR BELARUS:

2020 AT A GLANCE

The 2021 EU4Business Country Report for Belarus shows that the difficulties and challenges due to the COVID pandemic continue to affect SMEs and are equally challenging for the delivery of support by EU partners and implementers. The immediate EU response to the COVID pandemic was to increase the budget of the EU4Business Portfolio and reorient projects to meet these peculiar circumstances.

This means that in 2020, the budgets available to support SMEs in the EaP rose by

representing an increase in

Despite the multiple lockdowns across much of 2020, EU disbursements rose in 2020

Despite this, EU4Business projects and programmes have supported

1,448 SMEs in 2020

This is a significant proportion of the

110,777

micro-, small-, and medium-sized enterprises (based on national statistics data)

Almost no change

+2.3% from 2019

or **1/77** in

SMEs in the Belarus supported by the EU (assuming each SME receives support once only).

Mark Hellyer
Team Leader,
EU4Business Facility

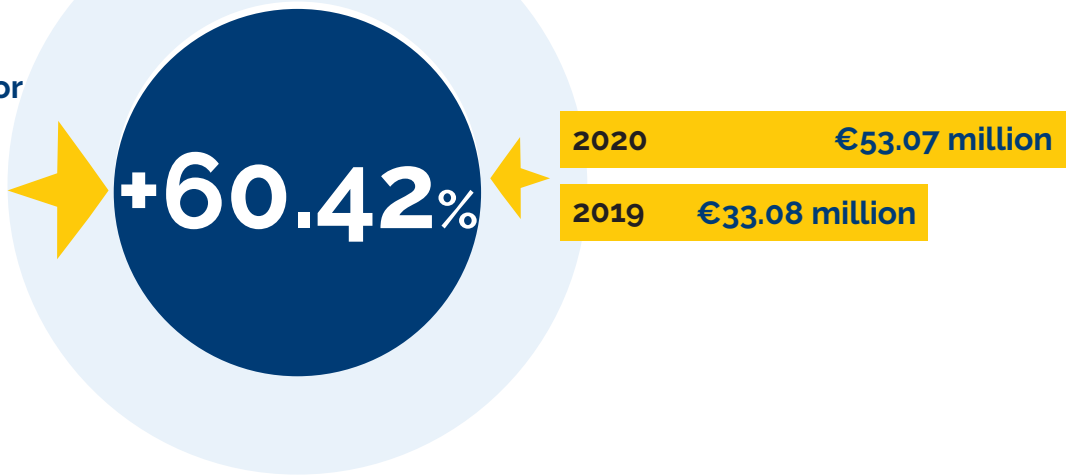

As businesses around the world continue to struggle with the effects of the COVID pandemic, the EU has demonstrated that it remains committed to supporting SMEs in Belarus. Despite the challenges of delivering this support, EU4Business initiatives have continued to deliver support and the number of SMEs supported have actually increased in 2020 but compared to 2019. As we move forward into the post 2020 policy environment, with ambitious targets of support and impact, EU4Business will continue to respond to the challenges and, in our 2022 annual report, we are confident we will be able to report on more support, stronger growth, and more jobs for SMEs in Belarus."

BY TYPE OF INTERVENTION

ACCESS TO FINANCE (A2F)

A2F is the largest area of support in Belarus representing 41.98% of budgets in 2020

A total of
€22.28 million
 +960.95%
 Compared with 2019

In EU support was allocated to unlock access to finance in Belarus in 2020

6

specific support instruments are used in Belarus

A1

Capped Loss Recovery

This is a risk-sharing instrument in the form of a grant that the EU provides to an IFI. This grant is used by the IFI to partially cover the loss that any PFI, such as a local bank, would carry as a result of SMEs not repaying part or all of its loan. In this way, the PFIs feel more comfortable and are willing to use the credit lines from IFIs to lend to SMEs. However, the EU grant only partially covers the potential loss that PFIs could claim. The recovery of loss covered by this EU risk sharing instrument is

generally up to 10% of the total loan portfolio of the respective PFI (total value of the loans disbursed by the PFI from the respective credit line of the IFI) and generally up to 50% of each individual sub-loan. This actually means that if an SME does not pay back the loan to the local bank, the EU grant for capped loss recovery can actually cover half of the loss of the bank. In this way, the local banks are more willing to disburse loans to SMEs which are generally perceived as high-risk borrowers.

A2

Interest Subsidy

This instrument is a grant given by the EU to IFIs in order to lower the cost of their loans to SMEs in the EaP. The grant provides interest subsidies of up to 10%, which is applied to the

regular interest rate, with which the IFI lends to PFIs and further on to SMEs. The purpose of this instrument is to lower the final cost of finance for SMEs in the EaP.

* This was the total value of contracts being implemented, not disbursements in 2020.

A3

Targeted Assistance (TA) to PFIs

This instrument consists of technical assistance to PFIs in the form of consultancy services, mentoring, and specialised training. The main effect of this instrument is that the PFIs (local banks and microfinance institutions) become

more familiar with the modus operandi of the big IFIs, the characteristics of their credit lines, their reporting requirements, as well as the standards regarding financial and risk analysis of the potential borrowers.

A6

SME Incentive Grants (linked to loans)

This instrument is different from regular grant schemes as the incentive grants are not given directly to SMEs as a "pure grant". The SME signs a loan contract from one of the credit lines of the IFIs via the PFIs. After the loan is disbursed, there is a verification process to check if the loan was used for the purpose listed in the business plan or feasibility study

and of the other pre-conditions for the loan disbursement. Once the verification report confirms compliance, a part of the loan is transformed into a grant, so that the total "cost" of financing is lowered. The most common incentive grants are between 10% and 15% of the loan value as is the case for the EBRD DCFTA facility 1 and 2.

A7

Grants to SMEs

These grants are non-reimbursable and generally modest in value in order to support as many SMEs as possible. In general, SME grants are disbursed in order to target specific economic development goals such as

development in rural areas, poor communities, or a response to various types of crises. These grants are usually disbursed through Non-governmental Agencies (NGOs) with links into targeted communities.

A8

Structured Funds

This instrument is implemented directly by EU participation as opposed to risk-sharing with IFIs. Typically, this involves direct loans or equity investment in a financial instrument or fund. As the EU does not have the capacity to disburse

direct loans to SMEs, this function is assigned to an intermediary. The most important EU investment in Direct Finance is shares in the European Fund for Southeastern Europe (EFSE).

BIG BENEFITS OF SMALL BEES

In November 2020, Natalia Vasko won the Entrepreneurship Development Initiatives competition with her project, "ApiMir: New Opportunities for Rural Business". With the support of EU4Business and UNDP, Vasko plans to open a support center for novice beekeepers in Žlobin County. To popularize beekeeping in the community, Vasko's Support Center will have a demonstration area, where excursions for novice beekeepers and art picnics will take place. During the sessions, participants will be able to learn how to get started in beekeeping and about some of the know-how for keeping bees. The Center will have a shared access facility, where the necessary equipment will be available, including a honey extractor, a wax melter, filters, and a table for unsealing honeycombs.

ONE WOMAN MAKING A DIFFERENCE TO BELARUS FARM FOLKS

With the EU4Business and UNDP support, Natalia Strok opened an Agro-Eco-Entrepreneurship Support Center in Bereza County of Brest oblast. Through it, locals are offered free courses in innovative technologies, the principles of green economy, and the basics of business and financial literacy. Strok works to teach her fellow Belarusians to work the land in a way that will allow them to grow high-quality eco-friendly produce for themselves and for sale, even on small secondary plots. Today, 15 residents of the county are already engaged in farming, using the seeds, seedlings, and knowledge they gained through the Center.

[Read full story](#)

I enjoy doing business, and I love working the land. I'm especially glad that I can introduce and teach innovative methods to my country folks. I'm sure that for many of them this will be a way out of the economic crisis, their main or extra income. It's time to put our knowledge and experience into practice. Even in difficult times, you always need to take at least one step forward, every day."

Natalia Strok

Director of Agro-Eco-Entrepreneurship Support Center

BUSINESS DEVELOPMENT

SERVICES (BDS)

BDS is the third largest area of support in Belarus representing 24.65% of budgets in 2020

A total of

€13.08
million

-0.8%

compared with 2019

In EU support was allocated to unlock access to finance in Belarus in 2020

5

support instruments used in Belarus for BDS are defined below

B1

Consultancy Services for SMEs

Through this instrument, the EU4Business Initiative aims to directly increase the knowledge and skills of SMEs in EaP countries through the direct provision (fully or partly paid) of non-financial business services (these can range from basic start-up and registration, accounting, marketing, input

supply, technology and product development, training and technical assistance, infrastructure support, and advocacy). These services can be delivered through both international and/or local consultants, in both private firms/individuals, and/or business support organisations.

B2

Capacity Building of BSOs

This instrument aims at increasing the capacity of Business Support Organisations (such as chambers of commerce, SME associations, professional bodies, the Sector Trade Association, training institutes, etc) to deliver BDS services to SMEs (whether members

or not). The capacity building is achieved through mentoring, training trainers, advisory services, and study tours to either enhance existing services, build new ones, or improve organisational structures.

B3

Incubators

The business incubator is an organisation designed to accelerate the growth and success of entrepreneurial companies through an array of business support resources and services that could include physical space, capital, coaching, common services, and networking connections.

The EU4Business Incubators Instrument generally shares the cost with the local authorities where

the EU bears the cost of refurbishment and cost-sharing arrangements for the running costs and/or service provision. One of the most important aspects related to this instrument is sustainability. As operation costs are high, the initial financial set-up is crucial for keeping the incubators viable after the EU4Business intervention ends.

B5

Trade Information

This instrument provides SMEs already exporting, exporting infrequently, or those interested in exporting with the range of information needed to move closer to exporting. This instrument can include generating the necessary information

(brochures, guides, market reports) or developing tools for accessing online resources and intelligent searches and covers market information, marketing guides, and market access requirements.

B6

B2B Activities

Business to Business (B2B) Activities support SMEs to make specific contact with nominally interested buyers (company decision makers in target export markets who regularly buy the export on offer). These can include participation in online buyer auctions, trade fair participation,

inward and outward trade missions, buyer meetings, etc. and EU4Business support can range from organisation, logistics, preparation and advice, as well as covering the costs of travel and/or stand and event costs.

SUCCESS STORIES

WASTE NOT, WANT NOT, SAYS BELARUS COUPLE WITH A FARM BUSINESS

SvetaSlava is a Belarusian family farming business with ambitious plans to expand and minimize costs through the advisory support of the EU and UNDP. The couple has attended specialized courses on where and how to look for customers, how to increase sales, including online. They learned how to make presentations and mastered video filming. As a part of a wider team, the couple also applied to compete in the project for socially significant initiatives and was selected for funding. Their initiative is called "Berry Land" and is based on cooperation among farmers. Every project participant has different needs: greenhouses, irrigation equipment, and even a freezer. They will soon be able to afford the new equipment so that the fruit and vegetables are not wasted.

[Read full story](#)

In early spring, everyone buys cucumbers, but by mid-summer many people already have their own. And while we can make pickles from cucumbers and tomatoes, surplus apples or berries are simply wasted. In fact, even vegetables can be dried for soups and broths. An air oven can solve this problem: our work will not be wasted, and the produce will maintain vitamins for the winter. With the EU support, we will soon be able to buy our air oven and a new walk-behind tractor!"

Svetlana and Vyacheslav Talchuk,
farmers from the village of Veletin

BUSINESS ENABLING ENVIRONMENT (BEE)

BEE is the second largest of area of support in Belarus representing 33.37% % of budgets in 2020

A total of

€17.71 million **→ -0.6%**
Compared with 2019

In EU support was allocated to unlock access to finance in Belarus in 2020

4 support instruments used in Belarus for BEE are defined below

C1

Capacity Building among Policymakers and Regulators

Through this instrument, EU4Business interventions aim at strengthening the capacity of staff of various government agencies to ensure better, more transparent, and open policies and regulations that affect business, whilst ensuring appropriate controls in the six Eastern Partnership countries. This can

include making and amending policies, laws, and administrative procedures based on need and risk assessment. Through this instrument, EU4Business interventions deliver direct advisory, mentoring services, and study tours to the relevant staff involved in policymaking.

C2

PPD (Public Private Dialogue)

Public Private Dialogue is an instrument for more inclusive and targeted policymaking. Specifically, it involves effective consultation and collaboration between government and

the private sector and/or its representatives, in order to achieve effective reform and administration of regulations that affect SMEs.

C3

Regulatory Reform

Through this instrument, EU4Business interventions support the EaP countries to improve the regulatory environment based on best practices and most often approximation (to align their SME related legislations, rules, and regulations with

those of the EU). Approximation occurs in all six Eastern Partnership countries, but it is more intensely applied in the three DCFTA countries, which are committed to widespread adoption of EU business acquis under the Association Agreement (AA).

C4

Information and Communication to SMEs

Through this instrument, EU4Business interventions support government to inform SMEs on reforms and implications for their

business and steps to compliance with regulatory reform.

[ACHIEVEMENTS] LIN 2020

[AGGREGATE RESULTS IN BELARUS IN 2020]

With an increase in budgets of 60.42% allocated to SME development in 2020 in Belarus, and despite the challenges of COVID in terms of national lockdowns, restrictions on travel, and restrictions in business and government office operations, the level of disbursement of EU support rose by 22.5% in 2020 from €8.5 million in 2019. Whilst partners adapted to new ways of working so that the maximum number of SMEs were supported at this crucial time, the budgets remain in place to support the build-back process as soon as the situation normalises.

INCREASE IN TURNOVER

EU supported SMEs in Belarus increased turnover in 2020, although by less than the regional average.

EU supported SMEs in Belarus increased turnover in 2020 by less than in 2019 (+8.00% compared with +13.34%).

Increase in number of EU supported in 2020

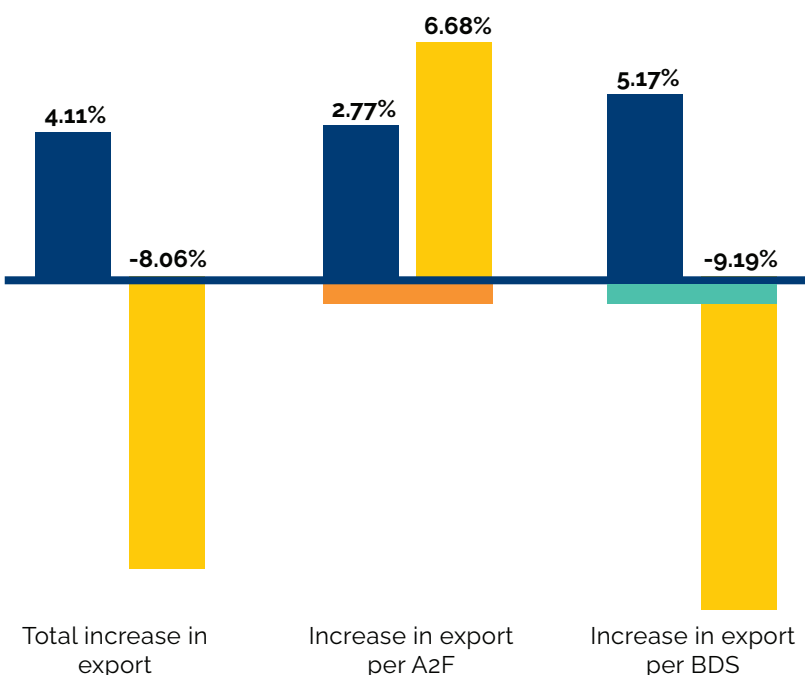

INCREASE IN EXPORTING SMES

The number of EU supported SMEs that started exporting in Belarus in 2020 is much higher than the average across the EAP.

The number of EU supported SMEs that started exporting in Belarus in 2020 is lower than in 2019 (3.95% compared to 6.75%).

The increase in exports of EU Supported SMEs in Belarus is higher than the EaP average.

INCREASE IN EXPORT

EU Supported SMEs in Belarus reduced exports in 2020.

Exports of EU Supported SMEs in Belarus saw a fall in exports in 2020 compared with a rise in 2019 (-8.06% compared with +4.0%)

MAXAVTO OFFERS BIKES FOR CAR REPAIRS, TRAINING FOR YOUNG PEOPLE IN BELARUS

SUCCESS STORIES

Maladzečna's Maxavto service station, whose owners wanted not only to expand their business, but also do something useful for their local community, benefitted from the EU and UNDP support. The grant they received aimed to support eco-friendly projects in Belarus was invested into new equipment in addition to the company's existing inventory. Then it was decided to kill two birds with one stone: help car owners while their vehicles are under maintenance and push them towards a healthier lifestyle. The company came up with the idea of lending bikes to clients for free instead of calling a cab to stay healthy and eco-friendly. The bicycle park with bicycles is ready now. On top of this, car amateurs and schoolchildren are offered workshops at the service station. As part of the initiative, Maxavto will generate 15 new jobs.

HOW 150 BUSINESS OWNERS FROM KOBRYN LAUNCHED A BUSINESS SCHOOL

The EU helped a local business club in Belarus go to a new level, turning from informal community of entrepreneurs to an official business support centre in just one year. Now it has more than 150 active business owners who share their experience and knowledge with others, and have also established dialogue between the business community and the government. The EU Project financed the purchase of the necessary equipment for educational events, and it funded corporate training for six active participants of the Business School in a variety of areas, from marketing to sales and negotiations.

[Read full story](#)

SUCCESS STORIES

We were told that our experience is unique at the national level and needs to be expanded, because it's hard to find such open and friendly gatherings of business people elsewhere. I'm sure that soon the Business School will appear not only in Kobryn, but in many other towns of Belarus. But all this would have been impossible without the support of the EU. The project was the catalyst that pushed us forward."

Sergey Panasyuk
